

Battery Tray Auto Drill / Rivet / Insert

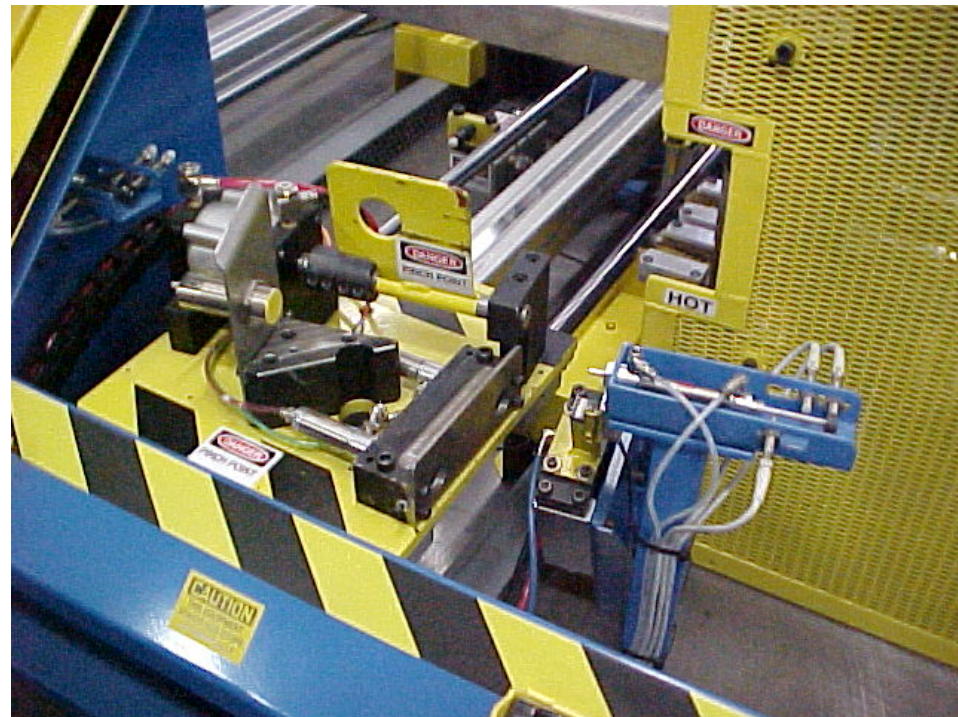

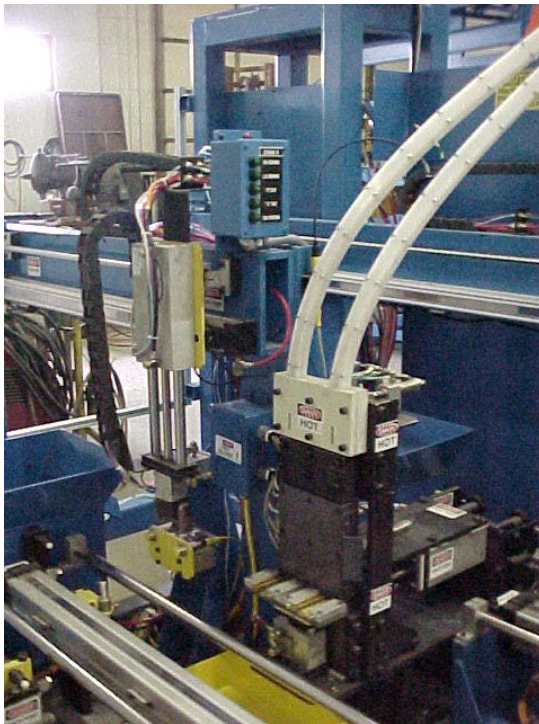

Custom machinery design and fabrication for any industrial application

Providing a full array of mechanical, electrical, and industrial engineering support. Let us apply our experience to create a cost effective solution for your application.

Panel Build / PLC Programming

Bowl Fed Compression Limiter Insertion Machine With Clip Assembly

W. G. Benjey has been serving industrial design and fabrication needs since 1961 and will continue to be a trendsetter in industry standards for years to come. We have a wide range of experience in fully and semi-automated systems, including clip insertions, component assembly, cutting and drilling operations, parts sorting, and dimensional verification. We would be pleased to send engineering personnel to your location to review your automation needs.
